Portfolio : <https://pasindu-sankalpa-basnayaka.netlify.app/>

Address : Kaduwela, Sri Lanka

SUMMARY

Motivated Data Science undergraduate with skills in Python, SQL, R, Power BI, Excel, and machine learning fundamentals. Experienced in building end-to-end projects, including web systems, dashboards, mobile applications, data warehouses, and predictive models. Quick learner with strong analytical, problem-solving, teamwork, and communication skills. Seeking a Data Science or Machine Learning internship to apply academic knowledge and gain real-world experience.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology, Specializing in Data Science
Undergraduate | Current GPA: 3.60 / 4.00

Kingswood College, Kandy

G.C.E. Advanced Level (A/L) – 2021

Physical Science Stream

Subjects: Combined Mathematics, Physics, Chemistry

Results: 3 C passes

PROJECTS

Retail Data Warehouse Development | SQL Server, SSIS

- Structured a centralized retail data warehouse by integrating CSV and SQL Server data sources using ETL workflows.
- Modeled a star schema with fact and dimension tables to support sales, customer behavior, and product performance analysis.
- Applied SCD Type 2 logic to track historical data changes and improve reporting accuracy.
- Technologies: SQL Server, SSIS, ETL, Data Warehousing, Star Schema, SCD Type 2

Retail BI Analytics & OLAP Reporting | SSAS, Power BI, Excel

- Configured an SSAS cube on top of a retail data warehouse to support multidimensional business analysis.
- Performed OLAP operations, including roll-up, drill-down, slice, and dice, to analyze sales and customer insights.
- Prepared Power BI dashboards and Excel reports to visualize sales trends, customer behavior, and business performance.
- Technologies: SSAS, Power BI, Excel, OLAP, DAX, Data Modeling

Predictive Analysis on Employee Confidence | R, Excel

- Analyzed 20,761 employee records from the EWCTS dataset to predict employee confidence scores on a 1–5 scale.
- Evaluated an ordinal logistic regression model using data preprocessing, hypothesis testing, and statistical modeling techniques.
- Identified training access as a statistically significant predictor of higher confidence levels with $p < 0.001$.
- Technologies: R, Excel, Data Cleaning, Statistical Modeling, Hypothesis Testing, Predictive Analytics

Car Sales Dashboard | Power BI, Excel

- Produced an interactive Power BI dashboard to analyze car sales trends, average pricing, cars sold, and regional distribution.
- Utilized Power Query, DAX, and data modeling techniques to clean, transform, and visualize sales data.
- Presented key sales insights through interactive visuals to support faster and clearer business decision-making.
- Technologies: Power BI, Excel, DAX, Power Query, Data Modeling
- GitHub: <https://github.com/sankalpa0303/PowerBI-Sales-Analysis.git>

Smart Campus Management System | Java, Spring Boot, React.js, MySQL

- Engineered a full-stack Smart Campus web application for booking management, ticketing, notifications, and role-based access control.
- Programmed REST APIs using Spring Boot and integrated MySQL for structured data storage and retrieval.
- Delivered a responsive React.js frontend to improve user accessibility and system usability.
- Technologies: Java, Spring Boot, React.js, MySQL, REST APIs
- GitHub: <https://github.com/dinushika-99/it3030-paf-2026-smart-campus-group-nexus.git>

Driving School Management System | React.js, Node.js, Express.js, MongoDB

- Developed a web-based driving school management system to manage student records, scheduling, and training-related data.
- Processed student performance and scheduling data to identify training patterns and improve session planning.
- Supported data-driven decision-making by organizing training records and schedule information in a MongoDB database.
- Technologies: React.js, Node.js, Express.js, MongoDB, JavaScript
- GitHub: <https://github.com/ravindu-sliit/RiyaGuru.git>

AI Chatbot using Gemini API

- Implemented an AI-powered chatbot using the Gemini API to enable real-time natural language interaction.
- Linked MongoDB to store chat data and manage user conversations in a web-based system.
- Applied NLP and conversational AI concepts through a MERN stack application with REST API integration.
- Technologies: React.js, Node.js, Express.js, MongoDB, Google Gemini API, JavaScript, REST APIs
- GitHub: <https://github.com/sankalpa0303/AI-Chatbot-using-Gemini-API-MERN-.git>

CERTIFICATIONS & PROFESSIONAL TRAINING

• Artificial Intelligence & Machine Learning Engineer – Stage 1 Sri Lanka Institute of Information Technology	Jan 2026
• Python for Beginners University of Moratuwa , Department of Computer Science	Dec 2025
• MongoDB Data Modeling Path MongoDB	May 2026

SKILLS

Programming & Data Science: Python, R, SQL
Databases: MySQL, MongoDB, SQL Server
Data Visualization & Analytics: Power BI, Excel, DAX, Power Query, SSAS, OLAP
Machine Learning & Statistics: Machine Learning Fundamentals, Predictive Analytics, Statistical Modeling, Hypothesis Testing, Data Cleaning
Backend Development: Node.js, Express.js, Java, Spring Boot, REST APIs
Frontend Development: React.js, HTML, CSS, Bootstrap, Tailwind CSS, JavaScript
Tools & Platforms: GitHub, Visual Studio, Trello, Android Studio, SSIS

EXTRACURRICULAR, LEADERSHIP & ACHIEVEMENTS

- Awarded Super Merit in Cricket Certification for outstanding performance in 2017.
- Secured 3rd place in Long Jump at the Zonal Sports Meet.
- Volunteered with the IEEE Student Chapter and supported student activities.
- Organized a Data Bootcamp to support student learning and technical awareness.
- Served as School Cricket Team Captain and member of the SLIIT Cricket Team.
- Participated as a member of the School Cadet Band.
